FIRE-RATED
SECURITY GLAZING

ISOCLIMA *Specialty Glass, LLC* / **Global** Security Glazing

Fire Protective Security Glazing | Fire Resistive Security Glazing

- **Enhanced Safety:** Limits the spread of flames and smoke, providing crucial protection during a fire.
- **Cost-Effective:** Generally less expensive than fire resistive options, making it accessible for budget-sensitive projects.
- **Versatility:** Available in various forms such as wire glass, super tempered glass, and ceramic, each suitable for different architectural needs.

- **Comprehensive Protection:** Blocks not only smoke and flames but also radiant heat, significantly increasing safety.
- **Compliance with High Standards:** Meets rigorous ASTM E119 and UL 263 standards, ensuring top-tier fire resistance.
- **Flexible Applications:** Less restrictive in terms of size and installation options, allowing for use in a wider range of building designs and locations.
